

## CHARACTERISTICS:

Charcoal soap has been used for centuries for purification and detoxification purposes since the first documented use by the Egyptians in 3750 BC. Charcoal reduces size of pores and this beautiful black powder acts like a chemical magnet to attract and absorb whatever impurities and toxins it touches. It is one of the best natural skin care products because of this. It also acts as an exfoliator, buffing away dead skin cells and leaving skin bright and youthful. Nero cleansing and skin refiner bar is a natural soap leaving the skin clean from impurities. Charcoal gives the characteristic black color to the soap.

## QUALITIES &amp; BENEFITS:

**Charcoal**
